

## Alpine/Ice Climbing Checklist

Depending on the route you've chosen and the icy conditions of said route, you may need to stock all or some of the items from this list. Quantities of hardware will depend heavily on the route and your partners as well. Before heading out, be sure to check all of your hardware and gear to ensure its integrity, as a broken harness or crampon can be deadly when suspended on an icy slope. Please adjust this list to fit your individual needs.

Ba	sic Essentials	
	Harness Quickdraw, Locking, Non-Locking Carabiners	Rope Crampons Ice Axe/Whippet
